

JUICES, NECTARS, DRINKS
SYSTEM SOLUTIONS FOR HORECA

COMPANY

Belfood is a Polish family-owned company with extensive experience in the food industry. Our mission is to create innovative food products that meet the expectations of modern consumers. Transparency, partnership, and trust are the motto of our every action.

PURENA IS THE PROFESSIONAL SYSTEM SOLUTIONS FOR JUICES AND DRINKS IN THE HORECA SECTOR.

The system offers access to the best quality products: concentrates (Premix, Postmix), a wide range of equipment support (from simple jugs to advanced system POSTMIX) as well as training and service. These three inseparable elements are the pillars of the PURENA brand.

You scale your business and define your needs, and we will offer you the best, proven solution!

EFFECTIVENESS AND EFFICIENCY

COSTS AND PLASTIC EMISSION

PURENA IS SUSTAINABLE DEVELOPMENT

SAVINGS IN STORAGE SPACE AND LOGISTICS COSTS

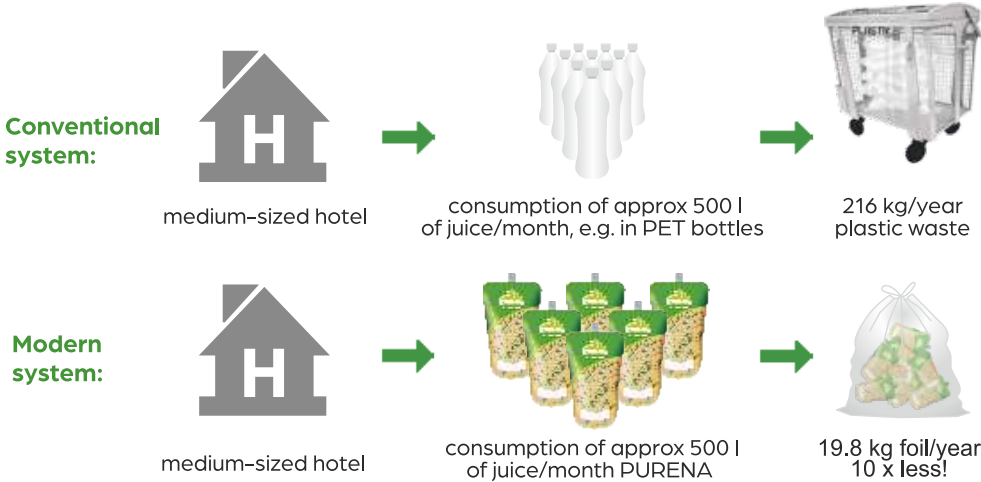

UP TO 10 x LESS PLASTIC CONSUMPTION

MODERN ASEPTIC TECHNOLOGIES

PURENA reduces packaging waste emissions. It's the right choice for the environment, your customers and your pocket.

There are many different products on the market that contain juice. A transparent classification is important to distinguish individual products, e.g. juices from drinks.

1 JUICE

Made solely from fruits or vegetables, 100% e.g. from fruits and vegetables content. Can be made from concentrated juices (concentrates) or pressed directly (NFC: *not from concentrate*).

ALLOWED: adding fruit flesh and purée, enriching with the vitamins and mineral salts.

BANNED: adding colorants, sweeteners, preservatives, adding any sugars.

THERE ARE NO JUICES:

- WITH ADDED SUGAR WITH AN ADDITION OF PRESERVATIVES
- WITH LESS THAN 100% FRUITS

2 NECTAR

Contains from 25 to <100% juice or fruit purée. Made by adding water and sugar and/or honey and occasionally citric acid to fruit juice/purée.

ALLOWED: adding sweeteners to "light" nectars.

BANNED: adding colorants, preservatives.

3 DRINK

Contains juice or fruit/vegetable puree 20% or less.

ALLOWED: chemically preserved, using colorants, artificial aromas, sweeteners, thickeners and other components, which aromatise and add flavour, but can be also used to enhance the drink.

If we add a prohibited ingredient such as preservative to the product even with a high content of juice, then such a product can be called only a beverage.

PASTEURIZATION

One of the oldest and most widespread methods of food preservation is pasteurization, i.e. high-temperature impact (about 90°C). Our mothers and grandmothers know how to use it while preparing homemade jams, compotes, and other preserves. During pasteurization, bacteria and other unfavorable microbes to human health are destroyed, preserving taste and nutritional values. With the advance of civilization, man discovered preservatives such as sodium benzoate or potassium sorbate.

We respect civilization`s achievements but we trust in nature – that's why we do not use preservatives in our products. Our products are pasteurized and packed in aseptic (clean) technology.
